Nazwa

Barco FDU-2129 12x9 inch Flight Display Unit for business aviation

Cena

0,00 zł

Producent

Barco

OPIS PRODUKTU

The FDU-2129 is an advanced 12x9 inch Flight Display Unit featuring two separate DVI digital video inputs. Equipped with the latest, sunlight-readable Active Matrix Liquid Crystal Displays technology, the FDU-2129 provides exceptionally high brightness and contrast along with an excellent viewing angle in all directions.

Versatile display

The FDU-2129 display is level A DO-178B and DO-254 certified. As a consequence, it can be used as a Primary Flight Display (in combination with an external symbol generator) in almost any type of business aircraft. The use of advanced electronics results in a very compact footprint and low power consumption.

Features

- Up to 2 digital video inputs
- 24 line select keys
- Extra wide viewing angle
- Compact design and low weight
- Low power consumption
- Fully compatible with the MOSArt™ open system processing unit
- Provisions for dual ARINC 818
- Extensive Built-In Testing (BIT)
- ETSO/TSO C-113 certification on request
- DO-178B & DO-254 certified (level A)
