BARCO

Nazwa **DPM-3 Rugged Display Processing Module**

Cena **0,00 zł**

Producent **Barco**

OPIS PRODUKTU

Compact design and MIL-qualified

Barco's DPM-3 computer is used for on-the-move operations in space-constrained crew stations of combat and tactical vehicles, and helicopters. The Barco DPM-3 delivers the latest MXM graphics and Intel® Mobile Core™ computing power, and is fully MIL qualified and field-proven.

The DPM-3 rugged computer is designed for optimal SWaP-C (Size, Weight, Power and Cost), offering the most compact package in its processing class, and ruggedization for the most extreme environments. Its modular and open architecture offers the possibility to create a complete, customized solution.

Real-time video processing

Barco's DPM-3 easily connects to a wide range of sensors and the discrete GPU enables hardware-accelerated image processing. The DPM-3 rugged computer features advanced video processing (e.g. image fusion) and offers high resolution video streaming functionality for improved situational awareness.

Features

Powerful processing performance in extreme conditions

Modular and open architecture allowing the most recent MXM graphics cards

Rugged design for on-the-move operations

High-resolution network video streaming

High-performance image processing

Extensive range of I/O options

Dual Ethernet featuring high redundancy

Scalable architecture for custom-made applications

Easy local or remote maintenance
