BARCO

Nazwa	TransForm N Universal Streaming Input Node
Cena	**0,00 zł**
Producent	**Barco**

OPIS PRODUKTU

The TransForm N Universal Streaming Input Node is part of Barco's innovative networked visualization solution. This component processes and redistributes up to 64 channels of streaming video.
Compatible with a continuously growing list of encoders and cameras, the Universal Streaming Video Input Node combines versatility with best in class performance
Features and benefits
Manages and harmonizes up to 64 channels and 300 Mbit/s of streaming video
Pre-processes the streams on the fly and feeds them to Barco's universal decoders, guaranteeing low-latency processing
Integrated watchdog functionality ensures high availability of the streaming video
Continuously growing list of compatible encoders/cameras, including support for high frame rate and megapixel images
Load reporting allowing higher level resource management
Easy integration into 3rd party video management systems through URI and SOAP based APIs
