OPIS PRODUKTU

LDT421V2

With excellent contrast and brightness, as well as a rapid response time, the LDT421V2 Widescreen LCD Display provides amazing video and data imagery in individual or tiled (video wall) configurations. These screens are ideal for digital signage, message boards, video conferencing, or retail kiosks.

Enhance your facilities with welcome messages, company promotions, human resources information, or data displays. Universities and other educational institutions can use the LDT421V2 in classrooms, lecture halls, media centres, student service centres, dining commons, and building lobbies.

Key Features:

Rapid 9 ms Response Time – Enjoy clear, fast moving pictures free of "ghosting".

Screen Saving Function – Four separate options (Gamma, Cooling Fan, Brightness and Motion) provide increased protection against image retention and image persistence.

Power Save - Detects when an input signal is no longer active and will automatically switch the monitor to a Power Save state to help prolong the life of the LCD panel.

High Contrast Ratio (1600:1) - For incredible visual detail, in both data and video display.

Scheduling - Display during the hours you want, with flexible control over the various inputs.

Tile Matrix - Create data/video walls with multiple LCD displays easily thanks to the simple OSD setup options.

Picture-in-Picture - Display two active inputs simultaneously (PC Mode only).

Panel Lock Out - Prevent unauthorized tampering of panel controls.

VESA Compliant - Allows for use with VESA standard mounting arms or brackets.

Optional speakers available

Three year limited warranty
