Nazwa

Wyświetlacz LED (wewnętrzny) Mitsubishi
LED Display (indoor) AVL-IDT16

Cena

0,00 zł

Producent

Mitsubishi

OPIS PRODUKTU

Mitsubishi's Diamond Vision IDT16 LED screen offers superb image clarity and uniformity at an extremely affordable price for indoor fixed installation applications, whether displaying video, graphics or text.

For indoor installations where a larger screen size or longer viewing distance is required, IDT16 is the ideal choice. The screen is rated accurately at 2,000 cd/m², which is ample for most indoor applications out of full, direct sunlight. IDT16 offers excellent viewing angles both horizontally and vertically. With colours resolved exceptionally close the screen with Mitsubishi's own 3in1 pixel design, the minimum viewing distance is surprisingly short. Mitsubishi's proprietary electrical and mechanical design represents a dramatic step forward in indoor LED screen performance, as our unique technologies deliver unfaltering uniformity, seamless images and unrivalled reliability. The construction is sturdy and robust, yet lightweight and aesthetically pleasing, so integrating IDT16 into any environment should be very straightforward. Service access for maintenance is available from the front and the rear, giving you more flexibility to choose your screen location and enclosure design. The IDT16 is set to continue as the preferred choice for indoor applications where quality must not be sacrificed, even though pixel resolution and screen size may be dictated by local conditions.

AVL-IDT16

Indoor use

Pixel pitch 16 mm

2,000 cd/m²

Viewing distance > 6m

Extreme viewing angle with no colour shift
