OPIS PRODUKTU

ODX8 for fixed Install. 8mm Dot Control, module LED system

The first choice for larger scale outdoor screen applications, with fantastic contrast and Mitsubishi's unrivalled picture quality.

Chosen by many of the world's premier outdoor venues, the performance of Diamond Vision ODX8 is exceptional,

with proven long-term reliability and a reputation for pure colour uniformity over years of service.

Mitsubishi's unique LED screen technologies combine to offer high contrast, natural colours and fast, smooth processing for great live video and razor sharp text.

The viewing angles both horizontally and vertically are excellent with colour integrity maintained throughout the viewing cone.

The screen is easy to install, virtually maintenance free and exceptional value for money in applications where viewing distances and venue design require a large scale solution.

AVL-ODX8
